Internet of Things
co-innovation immense **growth** potential
developing **new ideas** bringing together
innovative solutions players with
swift adaption & adoption different **capabilities**
ecosystem synergy **collaboration**

HIGHLIGHTS:

Mr Jeffrey Goh
CEO, NETS

Keynote Address

In an increasingly IoT'd world which holds promise to create new business models, improve business processes and optimise resources, there is a growing need to embrace collaboration and co-innovation to address the complexities and challenges of the IoT space.

Mr Goh will share on NETS' innovation journey and its partnerships with local enterprises to leverage on their strengths to bring smart payment & related IoT innovations to the market.

IOIC Official Launch

COIE officially launches the IoT Open Innovation Community and takes the opportunity to celebrate and mark the milestones in building and engaging the Community.

Partners' Sharing

Innovation partners such as technology providers, lead-demand drivers and SME partners will share their valuable experience and insights into successful collaboration and co-innovation within strong ecosystem structures.

Call for Collaboration

SME and industry partners will be at the event showcasing their innovative products and services and extending their call for collaboration.

Come join us and you might just land your business into a partnership that delivers the breakthrough you are looking for!
